Jujuy, Argentina · Remote · Available

PROFILE

Full stack developer and product founder with 4+ years shipping production software. Founded KILO (a retail management SaaS with an app on Google Play) and the software agency ZonaJujuy. I take products from idea to launch in weeks: mobile apps, multi-tenant business systems, e-commerce, and integrations with AI, payments and e-invoicing. I use AI (Claude, GPT, Gemini) heavily to speed up delivery without sacrificing quality.

EXPERIENCE

Founder & Lead Product Engineer 2023 – Present
KILO — Retail management SaaS · somoskilo.com

- Designed and built end to end a multi-tenant ERP + point of sale (web, desktop, Android) launched in 4 months.
- Integrated AFIP/ARCA e-invoicing, Mercado Pago QR payments and WhatsApp sales.
- Docker architecture on Linux VPS with Coolify, CI/CD and per-tenant data isolation (JWT + RBAC).
- Published and maintain the app on Google Play.

Founder & Full Stack Developer 2022 – Present
ZonaJujuy — Software agency · zonajujuy.com

- Custom systems, apps, online stores and websites (Next.js, WordPress) for companies and retailers.
- 15+ projects delivered across food service, healthcare, tourism, retail and services.
- Direct client work: discovery, quoting, development, release and support.

Product Engineer 2025 – 2026
SLOT / ZonaSalud — AI healthcare software · slot.zonajujuy.com

- Integrated LLMs in NestJS to summarize medical records into structured JSON.
- Built QR virtual queues and anti-no-show CronJobs that automatically reassign appointments.

Product Engineer 2025 – 2026
CHEFI — Restaurant SaaS · chefi.zonajujuy.com

- Real-time QR ordering, WhatsApp OTP login and cloud ticket printing.
- Cut order-taking errors by 40%.

EDUCATION

University Programmer Analyst 2022 – 2026 (in progress)
School of Engineering, UNJu (Argentina)

KEY ACHIEVEMENTS

- Own multi-tenant SaaS in production, launched in 4 months
