Gabriel Iturre

AI Engineer · LLM Products in Production · Founder & CEO of KILO

Jujuy, Argentina (UTC-3) · Remote · gabriel13iturre@gmail.com · +54 9 388 587-7934 · linkedin.com/in/gabriel-iturre · github.com/GabriellturreCs · gabrieliturre.tech

SUMMARY

AI engineer who ships LLM features that real businesses use every day. I build on Claude and other models with vision, tool use, retrieval and grounded answers, and I put cost caps, quotas and evaluation around them so they stay reliable and profitable. I also design the business case: which process to automate first, what it costs to run and what it saves. I work AI-first with Claude Code (CLAUDE.md, skills, hooks, subagents) and Codex, which lets one engineer ship what used to take a team.

83 merchants signed up in the first 6 weeks of KILO	**~700** sales per month recorded by KILO stores	**1,900+** commits in 10 months as the sole engineer	**15+** production products shipped since 2024

AI WORK IN PRODUCTION

- **Kilito (KILO):** assistant on the Claude API inside a point of sale on Google Play. Photo of a product → product created; photo of a supplier invoice → stock and costs updated; questions answered from the store's own sales. Per-plan quotas and a global daily cost cap.
- **Aevum:** RAG over a company's internal documents, with sources.
- **SLOT:** medical records summarized with AI (Gemini) inside a booking and queue system.
- **Prometo:** photo check-ins reviewed by a vision model (Llama 3.2 Vision on Workers AI), proof recorded on-chain.
- **Hacela corta:** AI background removal running fully in the browser, no server.
- **WhatsApp automation:** OTP login, automated replies and order intake for restaurants and stores.

EXPERIENCE

Founder & CEO · Product & AI Engineer — KILO 2024 – Present
AI point of sale and back office for neighborhood stores · somoskilo.com · Google Play

- Designed, built and launched the whole product alone: Android app (Capacitor 8), web app (React 19, TypeScript, Vite, Mantine, TanStack Query) and API (NestJS, Prisma, PostgreSQL, Redis).
- Payments end to end: Mercado Pago QR, Point card readers and subscriptions, Google Play Billing, idempotent webhooks and per-plan transaction fees.
- Business side too: pricing and plans, free tier, onboarding, content and growth. Infrastructure on Cloudflare Workers and R2, Coolify on a VPS, GitHub Actions CI and over-the-air web updates.

Full-Stack Engineer — Cheffi Jan 2025 – Feb 2026
Restaurant SaaS · full-time, remote

Full-Stack Engineer & Solutions Architect — Independent / ZonaJujuy 2024 – Present
Software studio: end-to-end products for retail, healthcare and services
